Applicant: Masashi TAKAHASHI et al.
Title: IMAGE FORMING APPARATUS
Appl. No.: Unassigned
Filing Date: 03/19/2004
Examiner: Unassigned
Art Unit: Unassigned

INFORMATION DISCLOSURE STATEMENT
UNDER 37 CFR §1.56

Mail Stop PATENT APPLICATION
Commissioner for Patents
PO Box 1450
Alexandria, Virginia 22313-1450

Sir:

Submitted herewith on Form PTO/SB/08 is a listing of documents known to Applicants in order to comply with Applicants' duty of disclosure pursuant to 37 CFR §1.56. A copy of each listed document is being submitted to comply with the provisions of 37 CFR §1.97 and §1.98.

The submission of any document herewith, which is not a statutory bar, is not intended as an admission that such document constitutes prior art against the claims of the present application or that such document is considered material to patentability as defined in 37 CFR §1.56(b). Applicants do not waive any rights to take any action which would be appropriate to antedate or otherwise remove as a competent reference any document which is determined to be a *prima facie* art reference against the claims of the present application.

TIMING OF THE DISCLOSURE

The listed documents are being submitted in compliance with 37 CFR §1.97(b), within three (3) months of the filing date of the application.

RELEVANCE OF EACH DOCUMENT

The relevance of foreign-language documents A1 and A2 is described in the present specification.

Document A1 discloses a secondary transfer member and a cleaning member. The secondary transfer member is in contact with an intermediate transfer member during an image forming operation, at least in the period between the start of forming an electrostatic latent image and the end of a secondary transfer operation. The cleaning member removes toner from the secondary transfer member and is made of a brush.

Document A2 discloses technology that satisfies $5 \times 10^3 \leq (R1/R2) \times (V2/V1) \times D \leq 6 \times 10^5$, where R1 is an outer diameter (mm) of a secondary transfer roller 30, V1 is a circumferential velocity (mm/sec) of the secondary roller 30, R2 is an outer diameter (mm) of a brush roller 31, V2 is a circumferential velocity (mm/sec) of the brush roller 31, and D is a density at which bristles are transplanted.

Document A3 discloses using fur brushes (agitating members) which are brought into contact with an intermediate transfer roller when this intermediate transfer roller is cleaned.

English translations of the foreign-language documents are not readily available. However, the absence of such translations does not relieve the PTO from its duty to consider the submitted foreign language documents (37 CFR §1.98 and MPEP §609). English language abstracts are provided herewith.

Applicants respectfully request that any listed document be considered by the Examiner and be made of record in the present application and that an initialed copy of Form PTO/SB/08 be returned in accordance with MPEP §609.

The Commissioner is hereby authorized to charge any additional fees which may be required regarding this application under 37 CFR §§ 1.16-1.17, or credit any overpayment, to Deposit Account No. 19-0741. Should no proper payment be enclosed herewith, as by a check being in the wrong amount, unsigned, post-dated, otherwise improper or informal or even entirely missing, the Commissioner is authorized to charge the unpaid amount to Deposit Account No. 19-0741.

Respectfully submitted,

By
